TO WHOM IT MAY CONCERN:

We had GEMSEC install a Maglock system on one of our high value clients, we would normally install locks ourselves but needed a specialist company for this particular door.

It was a pleasure to have Tony from GEMSEC on site on Friday it was nice to have an engineer who took not only pride in his work, but was also very knowledgeable and competent.

The client is extremely happy with the work completed.

Again many thanks to your engineer Tony for an excellent job and thank you GEMSEC for helping us deliver a project to our client
